ORGANIZED BY
NATIONAL INSTITUTE OF TECHNOLOGY PUDUCHERRY (AN INSTITUTE OF NATIONAL IMPORTANTCE)

ABOUT THE CONFERFERENCE

The International Conference on Digital Technologies and Smart Engineering Systems (ICDTSES) serves as a premier global forum for researchers, academicians, industry professionals, and policymakers to exchange ideas and present cutting-edge research at the intersection of digital innovation and engineering systems. The conference focuses on emerging digital technologies such as artificial intelligence, data science, cybersecurity, cyber-physical systems, robotics, AR/VR, quantum computing, and intelligent manufacturing, with strong emphasis on their applications in smart, sustainable, and human-centered engineering systems.

ICDTSES aims to foster interdisciplinary collaboration, promote industry–academia interaction, and address contemporary challenges in reliability, safety, sustainability, and digital transformation. The conference provides a platform to showcase theoretical advances, practical implementations, and future research directions, contributing to the advancement of next-generation smart engineering solutions at a global scale.

ABOUT THE INSTITUTE

National Institute of Technology Puducherry (NITPY) is one of the thirty-one National Institutes of Technology in India, established by the Government of India in 2009 under the Eleventh Five-Year Plan (2007–2012). Located in Karaikal, a coastal enclave in the Kaveri river basin, It is one of the ten newer NITs established by the Government of India, located in the Union Territory of Puducherry.

Despite its young age, NITPY is committed to developing competent and responsible technocrats who contribute to national growth, while continuously striving for excellence through strong integration of academics, research, and consulting and training activities.
